

MAN GENUINE PARTS

Your reliable and guaranteed partner to keep your business on the road

Your Benefits at a Glance:

- Financial advantages through package prices
- Worldwide 24-months Genuine Parts warranty
- State-of-the-art MAN Genuine Parts
- MAN quality thanks to the latest technology
- Problem-free fit and short downtime

Wear is not usually limited to a specific part of a mechanical or technical interconnected system. Therefore it often makes sense to also replace other parts related to a repair in order to avoid possible repeated maintenance or repair work. MAN Kits include a complete set of the required MAN Genuine Parts so that maintenance and overhaul work can be carried out as comprehensively and sustainably as possible.

MAN Genuine Parts Kits.

KITS

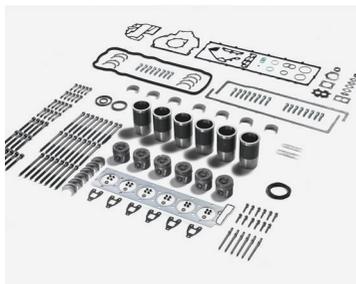

MAN GENUINE PARTS KITS

Piston Kit

From a technical point of view MAN Genuine Piston Lining Kits are the perfect choice when facing fractions in the piston and piston lining. A fraction always effects the complete piston system and has to be treated properly always. The MAN top-quality Piston Lining Kits will assure your vehicle to operate on the highest performance level with the lowest fuel consumption in the market.

Engine Overhaul Kit

The components package that you need for the overhaul of your engine varies depending on the mileage. To help you choose the right one, we have assembled convenient Engine Overhaul Kits in sizes M and L. These contain all the relevant parts with MAN high-quality standards.

Clutch Kit

The MAN Genuine Clutch Kit contains the Clutch Disc, Pressure Plate and Release Bearing. MAN recommends to replace the complete kit because if one item has reached the point of wearing out, the other parts have reached that point as well. By using the kit your risk of downtimes or early damages to the replaced part will decrease to a minimum.

Filter Kit

Filters play a significant role when it comes to the reliable operation of your MAN vehicle. One of the main tasks of the MAN Genuine Oil, Air and Fuel Filters is to protect engines against premature wear and tear.

Belt Tensioning Kit

MAN Genuine Belt Tensioning Kits are perfectly adapted to all the relating components. Therefore, they do not only ensure the longest possible life cycle for the entire belt drive, but also extend the life cycle of the consumers that are driven by the belt. The fully coordinated belt drive system reduces wear and tear on consumers such as alternators, coolant pumps and refrigerant compressors.

Brake Kit

When it comes to stopping distance you don't get a second chance. So think before purchasing third-party parts for repairs and replacements. Our MAN Genuine Brake Lining Sets will help you to maintain the reliability and safety of your entire brake system.
